

LIST OF PUBLICATIONS OF G. RAJASEKARAN

1. Λ - binding in hypernuclei by nonlocal interaction, (with S.N. Biswas), Phys. Rev. **122**, 712 (1961).
2. The spins and lifetimes of the light hypernuclei, (with R.H. Dalitz), Phys. Letters **1**, 58 (1962).
3. Resonance poles and mass differences within unitary multiplets, (with R.H. Dalitz), Phys. Letters **7**, 373 (1963).
4. The binding of $\Lambda\Lambda$ - hypernuclei, (with R.H. Dalitz), Nucl. Phys. **50**, 450 (1964).
5. Scattering amplitudes on unphysical sheets and resonance poles, Nuovo Cimento **31**, 697 (1964).
6. Meson-Baryon mass splittings and resonance multiplets in SU_3 symmetry, Nuovo Cimento **37**, 1004 (1964).
7. A model calculation for the Y_o^* (1405) Resonant State, (with R.H. Dalitz and T.C. Wong), Phys. Rev. **153**, 1617 (66).
8. Decimet Baryons as "Elementary Particles", Phys. Rev. **159**, 1488 (1967).
9. Current Commutator and CPT, Phys. Rev. **160**, 1427 (1967).
10. Y_o^* (1405) as a possible exception to the quark-picture of Hadrons - *Proc. of the Tenth Symposium on Cosmic Rays, Elementary Particles and Astrophysics*, Aligarh, 1967, P.521.
11. Radiative Corrections to β decay - *Proc. of the Tenth Symposium on Cosmic Rays, Elementary Particles and Astrophysics*, Aligarh, 1967, P.507.
12. Does the electromagnetic current have an $I = 2$ component? (with P.P. Divakaran and V. Gupta), Phys. Rev. **166**, 1792 (1968).
13. Can Y_o^* (1405) be a bound state of three quarks? *Symposia on Theoretical Physics and Mathematics* (Plenum Press), Vol. **9**, 531 (1969).
14. $SU(3)$ Symmetry Breaking in Semileptonic Decays, (with L.K. Pandit), Nucl. Phys. **B 9**, 531 (1969).
15. Restrictions on Schwinger Terms due to Lorentz Covariance, (with V. Gupta), Nucl. Phys. **B 10**, 11 (1969).
16. Sum Rules from Local Current Algebra, (with V. Gupta), Phys. Rev. **185**, 1940 (1969).

17. On the Electron-Muon Universality in Strangeness Changing Processes, (with K.V.L. Sarma), Nucl. Phys. **B 18**, 568 (1970).
18. The Leptonic K-Decays with Broken $SU(3) \times SU(3)$ and $SU(3)$ and Violation of $(\mu - e)$ - Universality, (with S.C.Chhajlany and L.K.Pandit), Nucl. Phys. **B 21**, 1 (1970).
19. Axial Vector $K_{\ell 4}$ - Decay Form-factors based on Current Algebra, (with S.C. Chhajlany and L.K. Pandit), Phys. Rev. D2, 1934 (1971).
20. Inelastic Electron-Proton Scattering and a Sum Rule for the Schwinger Term, (with V. Gupta), Phys. Rev. D3, 677 (1971).
21. A fixed pole in the Virtual Compton Amplitude A_2 , (with R. Rajaraman), Phys. Rev. **D3**, 266 (1971).
22. Schwinger Terms, Fixed Poles and Inelastic $e - p$ Scattering, *Proc. of Symposium on Particles and Fields*, University of Madras, 1971, p.113.
23. Effective-Dipole Form-Factors for the $K_{\ell 3}$ - Decay, (with S.C. Chhajlany and L.K. Pandit), Phys. Letters 35B, 166 (1971).
24. Empirical Test for Composite Hadrons, Phys. Rev. **D5**, 610 (1972).
25. Yang-Mills Fields and Theory of Weak Interactions, Report of Saha Institute Lectures (1971).
26. Divergences of the Higher Order Corrections to μ - Decay in the Gauge Theory, Phys. Rev. **D6**, 3032 (1972).
27. Scaling and Asymptotic Behaviour of Form Factors, (with P.P. Divakaran), Nucl. Phys. **B 60**, 437 (1973).
28. Contribution of Neutral Currents to the Decay $K_L \rightarrow \mu^+ \mu^-$ (with S.H. Patil), Unpublished report TIFR/TH/72-37.
29. Unification of weak and Electromagnetic Interactions, *Proc. of the First Symposium on High Energy Physics, Bombay*, (Dept. of Atomic Energy, 1972), p.331.
30. Analysis of the Neutral-Current Interaction in the Inclusive Neutrino Reactions, (with K.V.L. Sarma), Pramana **2**, 62 (1974) E 225.
31. Gauge Theories and the Neutral-Current — New Developments in Weak Interactions, Physics News **5**, 6 (1974).
32. Model-Independent Analysis of the Neutral-current Interaction in the Inclusive Neutrino Reactions, (with K.V.L. Sarma), Pramana **3**, 44 (1974).
33. Bounds on the Coupling Constants of the Neutral Current, (with K.V.L. Sarma), Physics Letters **55 B**, 201 (1975).

34. Theoretical Implications of the Resonance Anomalies in e^+e^- System, (with S. Pakvasa and S.F. Tuan), Phys. Rev. **D 11**, 1345 (1975).
35. General Space-Time Structure of the Neutral-Current Interactions, (with S. Pakvasa), Phys. Rev. **D 12**, 113 (1975).
36. Comments on “Is Bound Charm Found”? (with J. Pasupathy), Phys. Rev. Lett. **34**, 1250 (1975).
37. Effect of Gluons on Neutral-Current Interactions, (with Probir Roy), Pramana **4**, 222 (1975).
38. Interpretation of the new particle of the cosmic ray neutrino experiment, (with K.V.L. Sarma), Pramana **5**, 78 (1975).
39. Charmed Particles and Anomalies in Antineutrino Collisions, (with K.V.L. Sarma), unpublished report.
40. Colour gluons and scaling in a Unified Gauge Model, (with Probir Roy), Pramana **5**, 303 (1975).
41. Radiative Decays, Photoproduction and Total Cross Section of ψ - particles, (with K.V.L. Sarma and J. Pasupathy), Pramana **6**, 29 (1976).
42. Colour Gluon Excitation at Fermilab, (with Probir Roy), Phys. Rev. Lett. **36** 355, 689 E (1976).
43. Integral versus Fractional Charges of Quarks - A view through Gauge Theory, *Few body Dynamics*, Edited by A.N. Mitra et al, North Holland (1976), p. 341.
44. General Bounds on the Isovector coupling constants of the weak neutral current, (with K.V.L. Sarma), Pramana **7**, 194 (1976).
45. Field Theory of Extended objects (Invited talk), *Proceedings of the Third Symposium on High Energy Physics, Bhubaneswar* (Dept. of Atomic Energy, 1976), Vol.II p.163.
46. Renormalizable Fermi Theory of Weak Interactions (Invited Talk), *Proceedings of the International symposium on Frontiers of Theoretical Physics* (University of Delhi, 1977), p.121.
47. Renormalizable Theories from Nonrenormalizable Interactions (with V. Srinivasan), Pramana **9**, 239 (1977).
48. Generation of Gluons from Quark Confinement (with V. Srinivasan), Pramana, **10**, 33 (1973).
49. Solitons, Monopoles and Bags (Invited talk), *Proceedings of the Nuclear Physics and Solid State Physics Symposium, Poona* (Dept. of Atomic Energy, 1977) p. 1.

50. Gauge Theory, *Proceedings of the Anniversary Symposium of Matscience, Madras* (1978).
51. Recent Developments in Gauge Theory, *Advances in High Energy Physics* (Tata Institute of Fundamental Research, Bombay), Vol. **3**, 333 (1977).
52. Neutral Current Cross sections for Neutrinos on Protons (with K.V.L. Sarma) - *Pramana* **11**, 609 (78).
53. Classical Solutions to Quark Confinement (with V. Srinivasan), *Pramana* **11**, 739 (78).
54. The possibility of two-gluon jets in electron-positron annihilation (with S.D. Rindani), *Phys. Letts.* **83 B**, 107 (1979).
55. Neutral Currents in left-right symmetric gauge models, (with J.K. Bajaj), *Pramana* **12**, 397 (1979).
56. General relations among observables in neutral-current phenomena mediated by one or two Z bosons, (with M.K. Parida), *Pramana* **13**, 183 (1979).
57. Linking weak interactions with electrodynamics (Popular article) *Science Today*, January 1979, p 17.
58. The electroweak mixing angle in unified gauge theories (with J.K. Bajaj) *Pramana* **14**, 395 (1980).
59. The electroweak mixing angle in unified gauge theories - the renormalization effects (with J.K. Bajaj), *Pramana* **14**, 411 (1980).
60. Constraints on the parameters of the Left-Right symmetric gauge models (with J.K. Bajaj) *Phys. Lett.* **93 B**, 461 (1980).
61. Electron-positron annihilation into three jets in the integer-charge quark model (with S.D. Rindani), *Phys. Lett.* **94 B**, 76 (1980).
62. Gauge Theories - A Review, *Proceedings of the Einstein Centenary Symposium*, Ahmedabad, 1979, p. 208.
63. Spin-dependance of the charged gluon contribution in deep inelastic scattering (with H.S. Mani and S.D. Rindani), *Physics Lett.* **95B**, 107 (1980).
64. Contribution of coloured Higgs bosons to e^+e^- annihilation into two jets (with S.D. Rindani), *Physics Lett.* **99 B**, 361 (1981).
65. Contribution of gluons and coloured Higgs bosons to e^+e^- annihilation into three jets (with S.Lakshmi Bala and S.D. Rindani), *Phys. Lett.* **105 B**, 477 (1981).
66. Integer-charged quark model and electorn-positron annihilation into three jets (with S.D. Rindani), *Prof. Theor. Phys.* **67**, 1505 (1982).

67. Contributions of neutral current couplings in arbitrary two-Z boson extensions of the Weinberg-Salam Model (with J.K. Bajaj) Unpublished report.
68. BAN in unorthodox models - Invited talk given at the *International Colloquium on Baryon Nonconservation* held at Bombay (January 1982) (published in the Proceedings, p.65).
69. Large-N gauge theory of loops and strings I and II (with H. Bohr) Phys. Rev. **D 32**, 1547, 1553 (1985).
70. Do the PETRA two-photon jet experiments rule out integrally charged quarks? (with T. Jayaraman and S.D. Rindani), Phys. Lett. **119 B**, 215 (1982).
71. A note on the annihilation of polarised e^+e^- beams into jets in the broken colour gauge theory (with S. Lakshmi Bala and S.D. Rindani), Phys. Lett. **117B**, 345 (1982).
72. Nonrenormalization of the weak vertex in gauge theories with integrally charged quarks (with M.S. Sriram), Pramana **19** 315 (1982).
73. The mass of the electron neutrino and electron capture in ^{163}Ho (with S. Yasumi etal), Phys. Lett. **122 B**, 461 (1983).
74. Validity of the equivalent-photon approximation for the production of massive spin-1 particles (with T. Jayaraman and S.D. Rindani), Pramana **26**, 21 (1986).
75. Is colour broken by a monopole? (with R. Ramachandran), unpublished report.
76. Grand Unified Theories - Invited Talk at the *VI High Energy Physics Symposium, Mysore*, (Dept. of Atomic Energy, 1982) (Proceedings p.1).
77. Magnetic Monopole - Invited Talk at *Thirty Years Commemoration symposium*, Saha Institute of Nuclear Physics, Calcutta, 1983 (Proceedings p.87).
78. Decays of W and Z in the broken-colour model (with S. Lakshmi Bala and S.D. Rindani), Pramana **24**, 423 (1985).
79. The recent single-tag two-photon experiments at PETRA and the issue of quark charges (with R.M. Godbole, J.C. Pati, S.D. Rindani and T. Jayaraman), Phys. Lett. **142 B**, 91 (1984).
80. Fields with vanishing colour-currents (with V. Srinivasan and M.S. Sri Ram), Pramana **24**, 435 (1985).
81. Modification of the equivalent-photon approximation for the production of massive spin-1 particles (with T. Jayaraman and S.D. Rindani), (unpublished report).
82. Direct Photon Production in e^+e^- collisions (with T. Jayaraman and S.D. Rindani) - Phys. Rev. **D 32**, 1262 (1986).

83. Two-photon production in pp and $p\bar{p}$ collisions (with T. Jayaraman and S.D. Rindani) - Phys. Rev. **D 33**, 672 (1986).
84. What is the next step after electroweak unification? in *Recent Advances in Theoretical Physics*, (World Scientific 1985) Ed: R. Ramachandran, p 89-144.
85. Quantum Interference Effects in a five-dimensional Kaluza-Klein Theory (with R. Parthasarathy and R. Vasudevan) - Classical and Quantum Gravity **3**, 425 (1986).
86. $p\bar{p} \rightarrow W^- \gamma X$ as a test of the quark charges (with S. Lakshmibala, X.-G.He and S. Pakvasa), Modern Phys. Lett. **A 1**, 277 (1986).
87. Higgs Couplings in the integer quark model (with S. Lakshmibala), Pramana **27**, 371 (1986).
88. $e^+e^- \rightarrow \gamma + 2$ jets as a test of quark charges (with X.-G.He, S. Pakvasa and S.D. Rindani), Phys. Lett. **B 185**, 158 (1987).
89. Quantum Interference Effects in a generalized Kaluza-Klein Theory (with R. Parthasarathy and P. Nagarajan) - Classical and Quantum Gravity **4** 1327 (1987).
90. Perspectives in High Energy Physics - Invited talk, in *VIII High Energy Physics Symposium, Calcutta*, 1986 Proceedings p.399.
91. Building up the Standard Gauge Model of High Energy Physics, in *Gravitation, Gauge Theories and the Early Universe*, Ed: B.R. Iyer et al, Kluwer Academic publishers 1989, p.185.
92. Superstrings - an elementary review, *Proceedings of the International Conference on Changing Faces of the Physics of Particles & Nuclei*, BHU, Varanasi (1987), p.195.
93. An Electroweak Factorization Theorem (with S.Lakshmibala) Int. J. Mod. Phys. **A4**, 2977 (1989).
94. Introduction to String Theories, in *Gravitation, Quantum Fields and Superstrings* (World Scientific, Singapore, 1988) P.333-393.
95. Is Quantum Mechanics Forever? TIFR/TH/89-13 (to be published in *Philosophical Foundations of Quantum Theory*, World Scientific, Singapore).
96. Interpretation of the recent Kolar events (with A.S.Joshipura, V.Gupta and K.V.L.Sarma), Pramana **33**, 639 (1989).
97. Stability of the S matrix pole (with S.S.Vasan), Pramana **34**, 183 (1990).
98. Mass shifts for the weak bosons in the integrally charged quark model (with N.G.Deshpande), Mod. Phys. Lett. **A5**, 301 (1990).
99. Electroweak radiative corrections and the masses of the weak bosons, in *Phenomenology of the Standard Model and Beyond* (World Scientific, Singapore, 1989) p.407.

100. Electroweak Symmetry, in Proceedings of Raman Centenary Symposium on *Waves and Symmetry*, Current Science **59**, 1080 (1990).
101. Rosenbluth scattering with Pauli moment for the electron (with R.Basu and M.V.N.Murthy), J. Phys. G **17**, 401 (1991).
102. Algebra for fermions with a new exclusion principle (with A.K.Mishra), Pramana **36**, 537 (1991).
103. The discovery of Dirac equation and its impact on present-day Physics, in *Dirac and Feynman : Pioneers in Quantum Mechanics*, Ed. by R.Dutt and A.K.Ray, Wiley Eastern (1993) p.9.
104. The future of high energy physics (Keynote address), in *Particle Phenomenology in the 90's*, Ed. by A.Datta et al, World Scientific (1992), p.1.
105. Two Topics in Electroweak Physics : Radiative Corrections and Baryon Number Violation, in *Particle Phenomenology in the 90's*, Ed. by A. Datta et al, World Scientific (1992), p.404.
106. New forms of quantum statistics (with A.K.Mishra) Pramana **38**, L411 (1992).
107. Orthosupersymmetric quantum mechanics (with A.Khare and A.K.Mishra), Int. J. Mod. Phys. **A8** 1245 (1993).
108. Parasupersymmetric quantum mechanics and its infinite order (with A.Khare and A.K.Mishra), Mod. Phys. Lett. **A8** 107 (1993).
109. Algebras of creation and destruction operators (with A.K.Mishra), Pramana – J. Phys. **40** 149 (1993).
110. Quantum field theory of orthofermions and orthobosons (with A.K.Mishra), Mod. Phys. Lett. **A7** 3425 (1992).
111. Complex q -mutator algebra and fractional statistics (with A.K.Mishra), Mod. Phys. Lett **A9** 419 (1994).
112. “Infinite Statistics” and its two-parameter deformation (with A.K.Mishra), Phys. Lett. **A138** 210 (1994).
113. An algebra for ordered particles (with A.K.Mishra) – Phys. Lett. **A203**, 153 (1995).
114. Is there a future for High Energy Physics? in *Proc. Int. Conf. on Non Accelerator Particle Physics*, Bangalore, 1994 Ed: R. Cowsik, World Scientific p.4.
115. Generalized Fock spaces, new forms of quantum statistics and their algebras (with A.K.Mishra) Pramana - J. Phys. **45** 91 (1995).
116. A new mechanism for neutrino masses in supersymmetric SO(10) grand unification (with K.S.Babu and M.K.Parida) – preprint IMSc-94/19 (to be published).

117. New forms of quantum statistics and generalized Fock spaces, in *Bose and 20th Century Physics*, Kluwer Academic Publishers (The Netherlands) 1995, Ed: Partha Ghose and Abhijit Mookerji (in Press).
118. Generalized Fock spaces, and new forms of quantum statistics, in *Current Trends in Mathematics and Physics (A tribute to Harish Chandra)* Ed: S.D. Adhikari, Narosa Publishing House, New Delhi, 1995, p.138.
119. An unified treatment of quantum interference effects (with R. Parthasarathy and R. Vasudevan), in *Selected Topics in Mathematical Physics (Prof. R. Vasudevan Memorial Volume)*, Ed: R. Sridhar etal, Allied Publishers Ltd., Madras, 1995, p 279.
120. Leptons and quarks as composites of orthofermions, in *Selected Topics in Mathematical Physics (Prof. R. Vasudevan Memorial Volume)*, Ed: R. Sridhar etal, Allied Publishers Ltd., Madras, 1995, p.288.
121. Solar and atmospheric neutrino oscillations with three flavours (with Mohan Narayan, M.V.N. Murthy and S. Uma Sankar) Phys. Rev. **D53** 2809 (1996).
122. Atmospheric neutrinos with three flavour mixing (with Mohan Narayan and S. Uma Sankar) Phys. Rev. **D56** 437 (1997).
123. Fock space representation of differential calculus on the noncommutative quantum space, (with A.K. Mishra) J. Math. Phys. **38** 466 (1997).
124. Solar eclipse and neutrinos (with Mohan Narayan and Rahul Sinha), Current Science **70** 848 (1996), **72** 417 (E) (1997).
125. Time-of-night variation of solar neutrinos (with Mohan Narayan and Rahul Sinha), Mod. Phys. Lett. **A13** 1915 (1998).
126. Solar neutrinos and the eclipse effect (with Mohan Narayan, Rahul Sinha and C.P. Burgess), Phys. Rev. **D60**, 073006 (1999).
127. Dynamics in a noncommutative phase space (with R.P. Malik and A.K. Mishra), Int. Journal of Mod. Phys. **A13**, 4759 (1998).
128. Perspectives in High Energy Physics, Indian J. Phys. **72A**, 679 (1998).
129. High Energy Physics in the 21st Century - An overview, Current Science **71** 109 (1996).
130. Particles and Fields (Status Report) in *Physics in India*, Indian National Science Academy, New Delhi, 1996, p.41.
131. Fock space for noncommutative calculus, in *Special Functions and Differential Equations* Ed: K. Srinivasa Rao etal, Allied Publishers (1998), p.280.
132. Three flavour implications of the result of the CHOOZ Collaboration (with M. Narayan and S. Uma Sankar), Phys. Rev. **D58**, 031301 (1998).

133. One pion events by atmospheric neutrinos (with K.R.S. Balaji and S. Uma Sankar), IMSc-98/06/26 (Int. J. Mod. Phys. - to appear).
134. A new mechanism for neutrino mass (with P.P. Divakaran), Mod. Phys. Lett. **A14**, 913 (1999).
135. Neutrinos from stellar collapse : effects of flavour mixing (with G. Dutta, D. Indumathi and M.V.N.Murthy), Phys. Rev. **D 61**, 13009 (2000).
136. Constraints on the mixing angles of Majorana neutrinos (with R. Adhikari), Phys. Rev. **D 61**, 031301 (1999).
137. Hierarchical four-neutrino oscillations with a decay option (with E.Ma and I. Stancu), Phys. Rev. **D 61**, 071302 (R) (2000).
138. A new differential calculus on noncommutative spaces (with R.P. Malik and A.K. Mishra), math-ph/9908001.
139. Phenomenology of neutrino oscillations, Pramana **55** (2000) 19.
140. Neutrinos from stellar collapse : comparison of the effects of three and four flavour mixing (with G. Dutta, D. Indumathi and M.V.N. Murthy), Phys. Rev. **D 62**, 093014 (2000).
141. Three inequivalent mass-degenerate Majorana neutrinos and a model of their splitting for neutrinos oscillations (with R. Adhikari and E. Ma), Phys. Lett. **B486**, 134 (2000).
142. Light sterile neutrinos from large extra dimensions (with E. Ma and U. Sarkar) Phys. Lett. **B495**, 363 (2000).
143. Neutrinos from stellar collapse : comparison of signatures in water and heavy water detectors (with G. Dutta, D. Indumathi and M.V.N. Murthy), hep-th/0101093.
144. Generalized Fock Spaces and New Forms of Quantum Statistics (with A.K. Mishra), To appear in *AIP Proceedings : SPIN 2000*, Ed: R.C. Hilborn and G.M. Tino.
145. Quantum Field Theory for Orthofermions and Orthobosons (with A.K. Mishra), To appear in *AIP Proceedings : SPIN 2000*, Ed: R.C. Hilborn and G.M. Tino.
146. Softly broken A_4 symmetry for nearly degenerate neutrino masses (with Ernest Ma) Phys Rev **D 64**, 113012 (2001).
147. The light unstable sterile neutrino (with Ernest Ma) Phys Rev **D 64**, 117303 (2001).
148. Anomalous magnetic moment of muon and L-violating supersymmetric models (with R Adhikari), ArXiv:hep-ph/0107279.
149. Double three-fold degeneracies for active and sterile neutrinos (with Ernest Ma), Mod. Phys. Lett. **A 16**, 2207 (2001).

150. Radiative stability of neutrino mass textures (with M K Parida and C R Das), *Pramana* **62**, 647 (2004).
151. High scale mixing unification and large and large neutrino mixing angles (with R N Mohapatra, and M K Parida), *Phys. Rev. D* **69**, 053007 (2004)
152. New "square root" model of lepton family cyclic symmetry (with Ernest Ma), *Phys. Rev. D* **68**,071302 (2003).
153. India-based neutrino observatory, Invited talk at NuFact 03, 5th International Workshop on Neutrino Factories and Superbeams, June 2003, Columbia University, USA (published in the Proceedings of the Workshop).
154. Working group report: Neutrinos and astroparticle physics, (with Srubabati Goswami etal) WHEPP-8, IIT-Mumbai, Jan 2004, *Pramana* **63**, 1301 (2004).
155. An SO(10) GUT with see-saw masses for all fermions (with Bipin R Desai and Utpal Sarkar), *Phys. Lett. B* **626**, 167 (2005).
156. Threshold effects on quasi-degenerate neutrinos with high-scale mixing unification (with R.N.Mohapatra and M.K.Parida), *Phys. Rev. D* **71**, 057301 (2005).
157. Large neutrino mixing angles for type-I see-saw mechanism in SO(10) GUT (with Bipin R Desai and Utpal Sarkar), *ArXiv-hep/0504066*.
158. Radiative magnification of neutrino mixings in split supersymmetry (with R N Mohapatra and M K Parida), *Phys Rev D* **72**, 013002 (2005).
159. Hexagonal SU(3) unification and its manifestation in the TeV scale (with Quing-Hong Cao, Shao-Long Chen and Ernest Ma), *Phys Rev D* **73**, 015009 (2006).
160. See-saw fermion masses ion an SO(10) GUT (with Kaushik Bhattacharya, C R Das, Bipin R Desai and Utpal Sarkar), *Phys Rev D* **74**, 015003 (2006).
161. Neutrino oscillation probabilities: Sensitivity to parameters (with D Indumathi, M V N Murthy and Nita Sinha), *Phys Rev D* **74**, 053004 ((2006).
162. From atoms to quarks and beyond: a historical panorama, *India in the World of Physics: Then and Now*, (Vol XIII Part 1, *History of Science...*) Ed: A N Mitra, Pearson Longman, p361 (2009); *ArXiv:Physics/o602131*.
163. *Subaltern Science in the South* (with M S Raghunathan), *Science and Modern India:An Institutional History, c.1784-1947*, Vol XV Part 4, *History of Science...*) Ed: Uma Das Gupta, Pearson Longman, p669 (2010).
164. Neutrino mixings and leptonic CP violation from CKM matrix and Majorana phases (with S K Agarwalla, M K Parida and R N Mohapatra), *Phys Rev D* **75**, 033007 (2007).

165. Observing the dark scalar doublet and its impact on the Standard Model Higgs boson at colliders (with Quing-Hong Cao and Ernest Ma), *Phys Rev D* **76** 095011 (2007).
166. Moller and Bhabha scattering in the noncommutative Standard Model (with PK Das and NG Deshpande), *Phys Rev D* **77**, 035010 (2008).
167. Are neutrinos Majorana particles? Keynote address at Workshop on Neutrinoless Double Beta Decay (NDBD07) at TIFR, Mumbai, published in the Proceedings of the Workshop (2007); ArXiv:0803.4387.
168. Neutrino condensate as origin of dark energy (with Jitesh R Bhatt, Bipin R Desai, Ernest Ma and Utpal Sarkar), *Phys Lett B* **687**, 75 (2010).
169. TeV scale implications of noncommutative space-time in laboratory frame with polarized beams (with Sumit K Garg, T Shreecharan, P K Das and N G Deshpande), *JHEP* 1107:024 (2011).
170. Group velocity of neutrino waves (with D Indumathi, Romesh K Kaul and M V N Murthy), *Phys Lett* **709** 413 (2012).
171. Profound Truths, *Current Science* **101**,727 (2011).
172. Cabibbo angle and the universality of weak interactions, *Physics News* **41**, 21 (2011).
173. A stable massive charged particle, ArXiv:1105.5213 (2011).
174. Manpower for fundamental physics experiments, *Current Science* **103**,19 (2012).
175. High energy physics in 2012, *Current Science* **103**, 250 (2012).
176. An angle to tackle the neutrinos, *Current Science* **103**, 622 (2012).
177. Standard Model, Higgs boson and what next?, *Resonance* **17** 956 (2012).
178. Anomalous Kolar events revisited: Dark matter? (with MVN Murthy), *Pramana, J.Phys.* **82**, L 609 (2014).
179. Models for light unstable dark matter particles (with Ernest Ma and MVN Murthy), under preparation (2014)
180. Anomalous Kolar events: A proposal for a DM decay detector at INO (with Vivek Datar, D Indumathi, MVN Murthy and B Satyanarayana), underpreparation (2014).
181. Predictions from high-scale mixing unification hypothesis (with Gauhar Abbas, Saurabh Gupta and Rahul Srivastava), *Phys Rev D* **89**, 093009 (2014).
182. High-scale mixing unification for Dirac neutrinos (with Gauhar Abbas, Suarabh Gupta and Rahul Srivastava), ArXiv:1312.7384 (2013).
183. Fermi and the theory of weak interactions, *Resonance* **19**, 18 (2014).
