DEPARTMENT OF PHYSICS

DWARAKA DOSS GOVERDHAN DOSS VAISHNAV COLLEGE

ARUMBAKKAM, CHENNAI

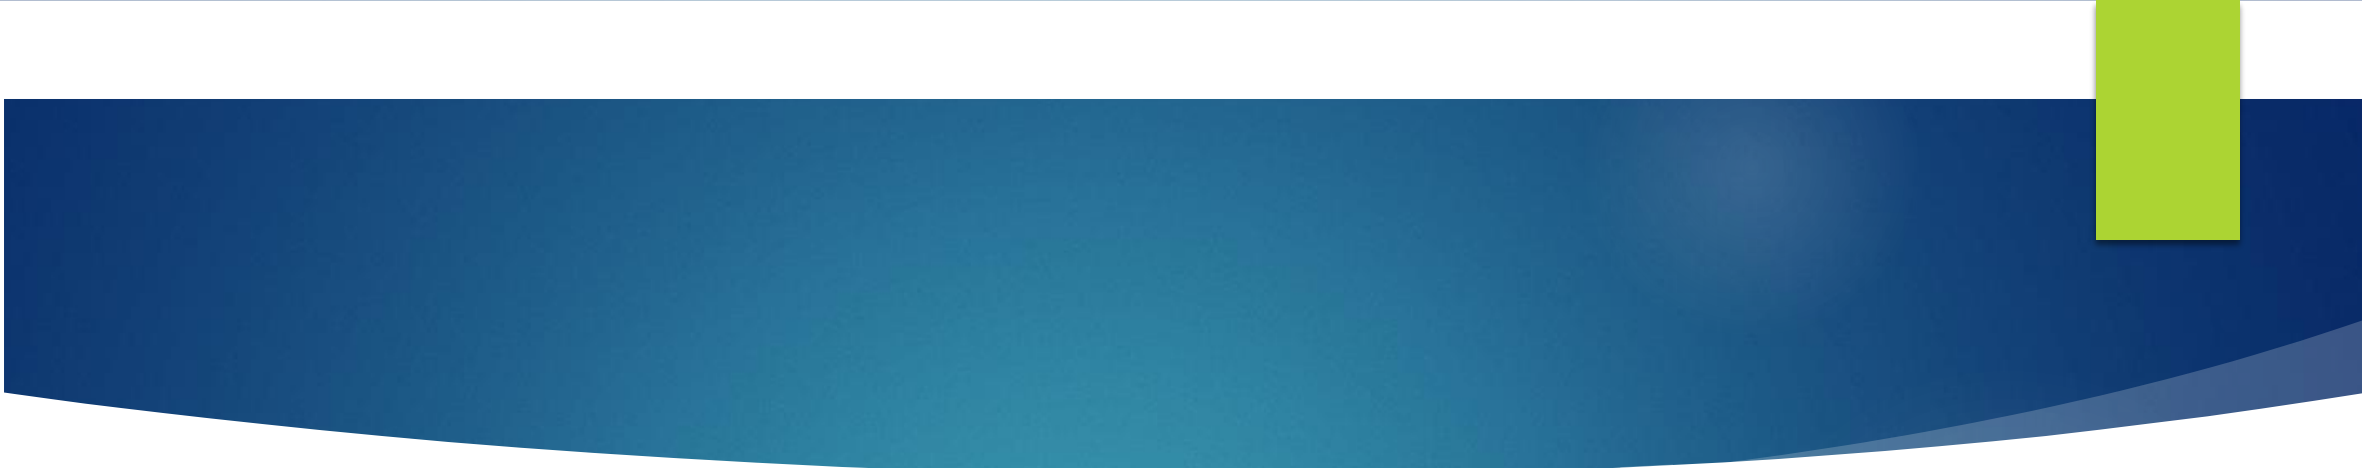

11, August, 2021

Take a Moment, Please....Answer yourself...

Activity 1

- ▶ Have you removed possible stumbling blocks in each part of the lesson?
- ▶ Are all/ most of the students engaged? % please
- ▶ Are there any barriers to learning for the slow learners in your class? What about the high achievers?
- ▶ Will active kinaesthetic learners feel stifled or excited by your lesson?

- 
- ▶ Do Tamil / Tamil/ Telugu ...medium learners have the tools to understand and meet your expectations?
 - ▶ Are gifted students bored?
 - ▶ Could every student describe what they have learned in some way?
 - ▶ Are your learning goals intact for **each student**?
 - ▶ Am I moving towards CAS format that will come after five years?
 - ▶ Is my teaching path as per NEP ?

- ▶ OBE- Outcome based Education questionnaire?
- ▶ This session is all about making us do whatever we have been passionately doing, but with a twist...

Come...
Let US

LEARN
UNLEARN
RELEARN

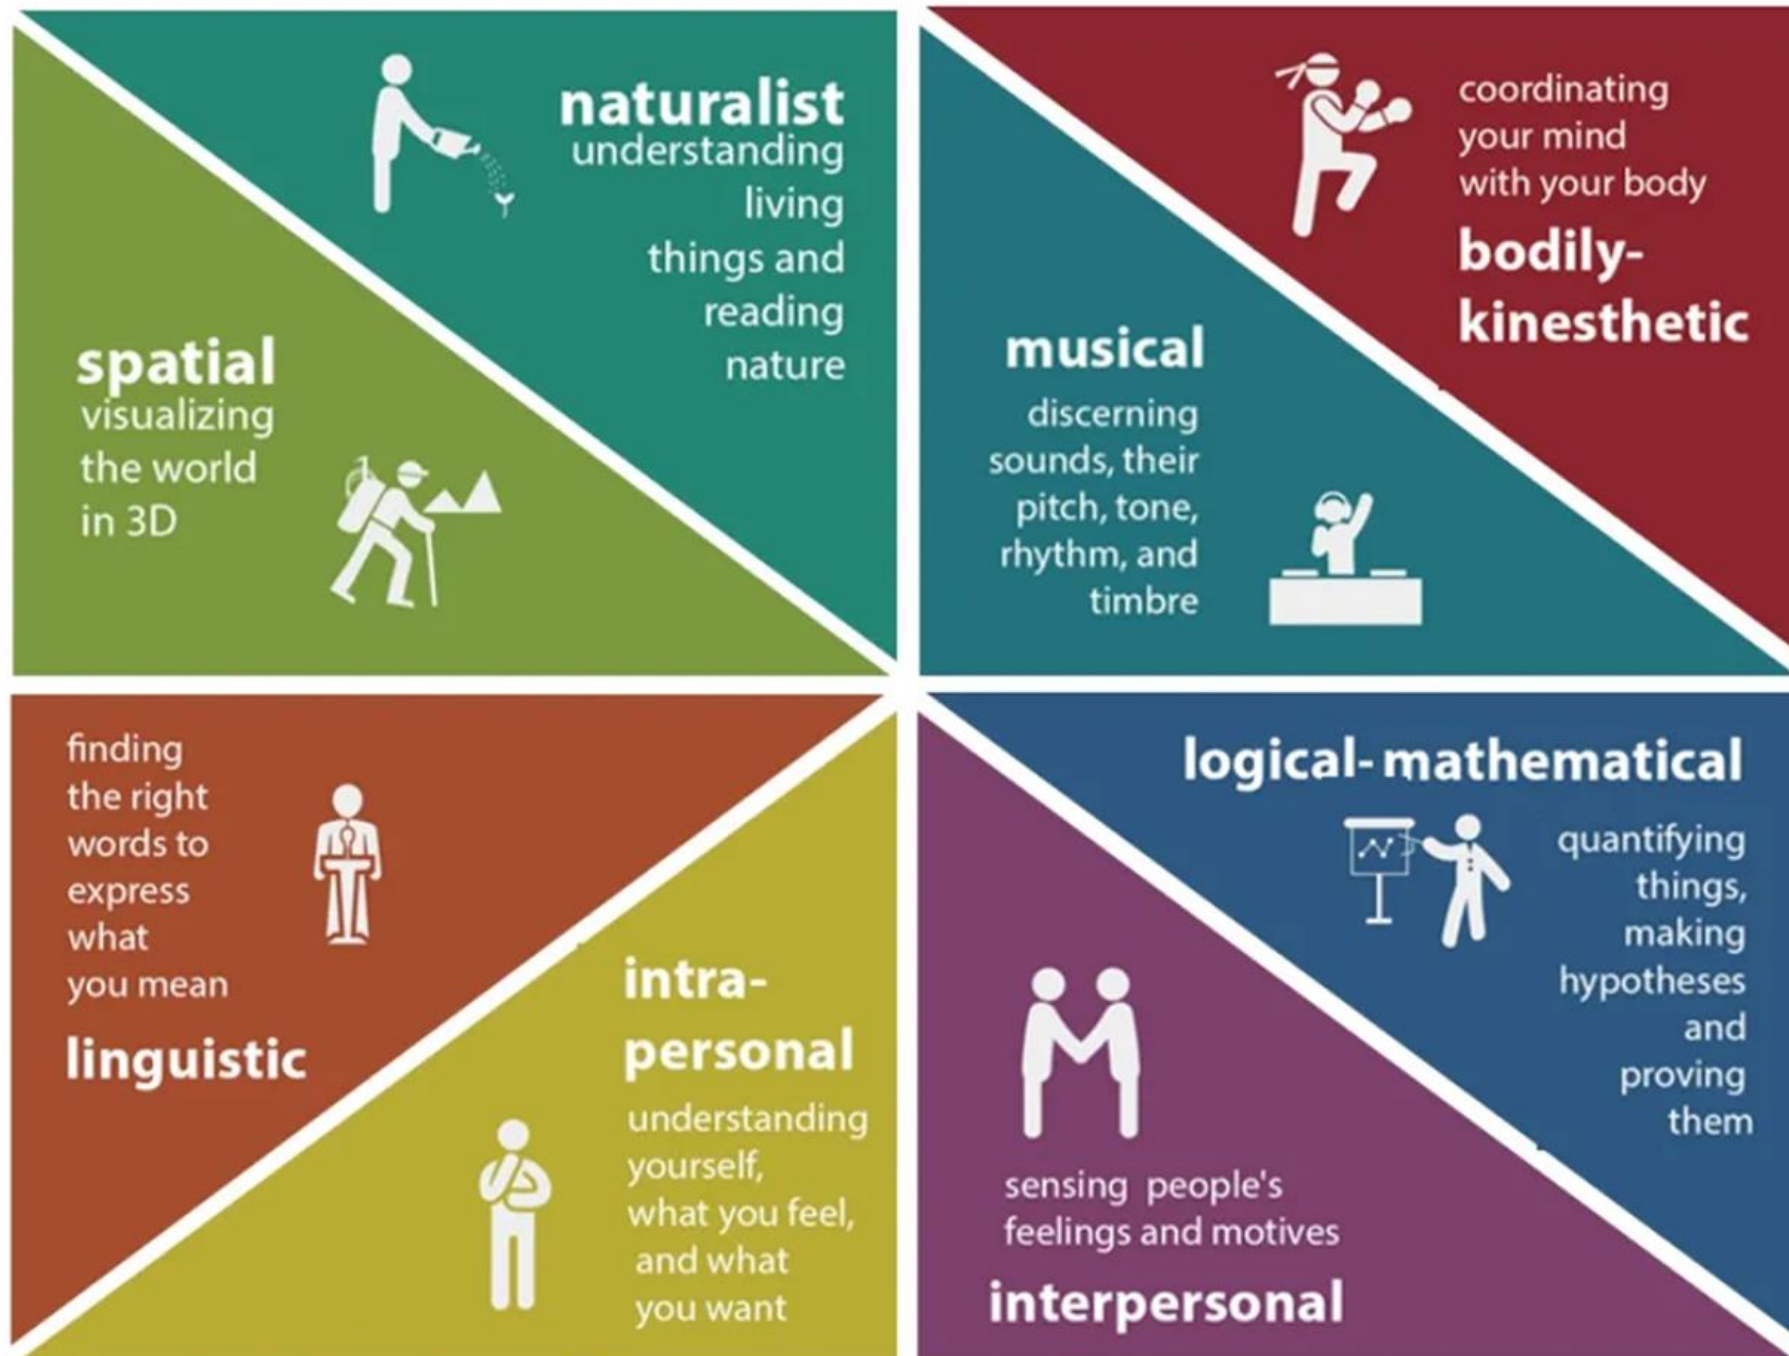

Together

A graphic showing the word 'Together' in a colorful, stylized font. Below the letters, several hands of different skin tones are shown holding up the word, symbolizing unity and teamwork.

What is Differentiation?

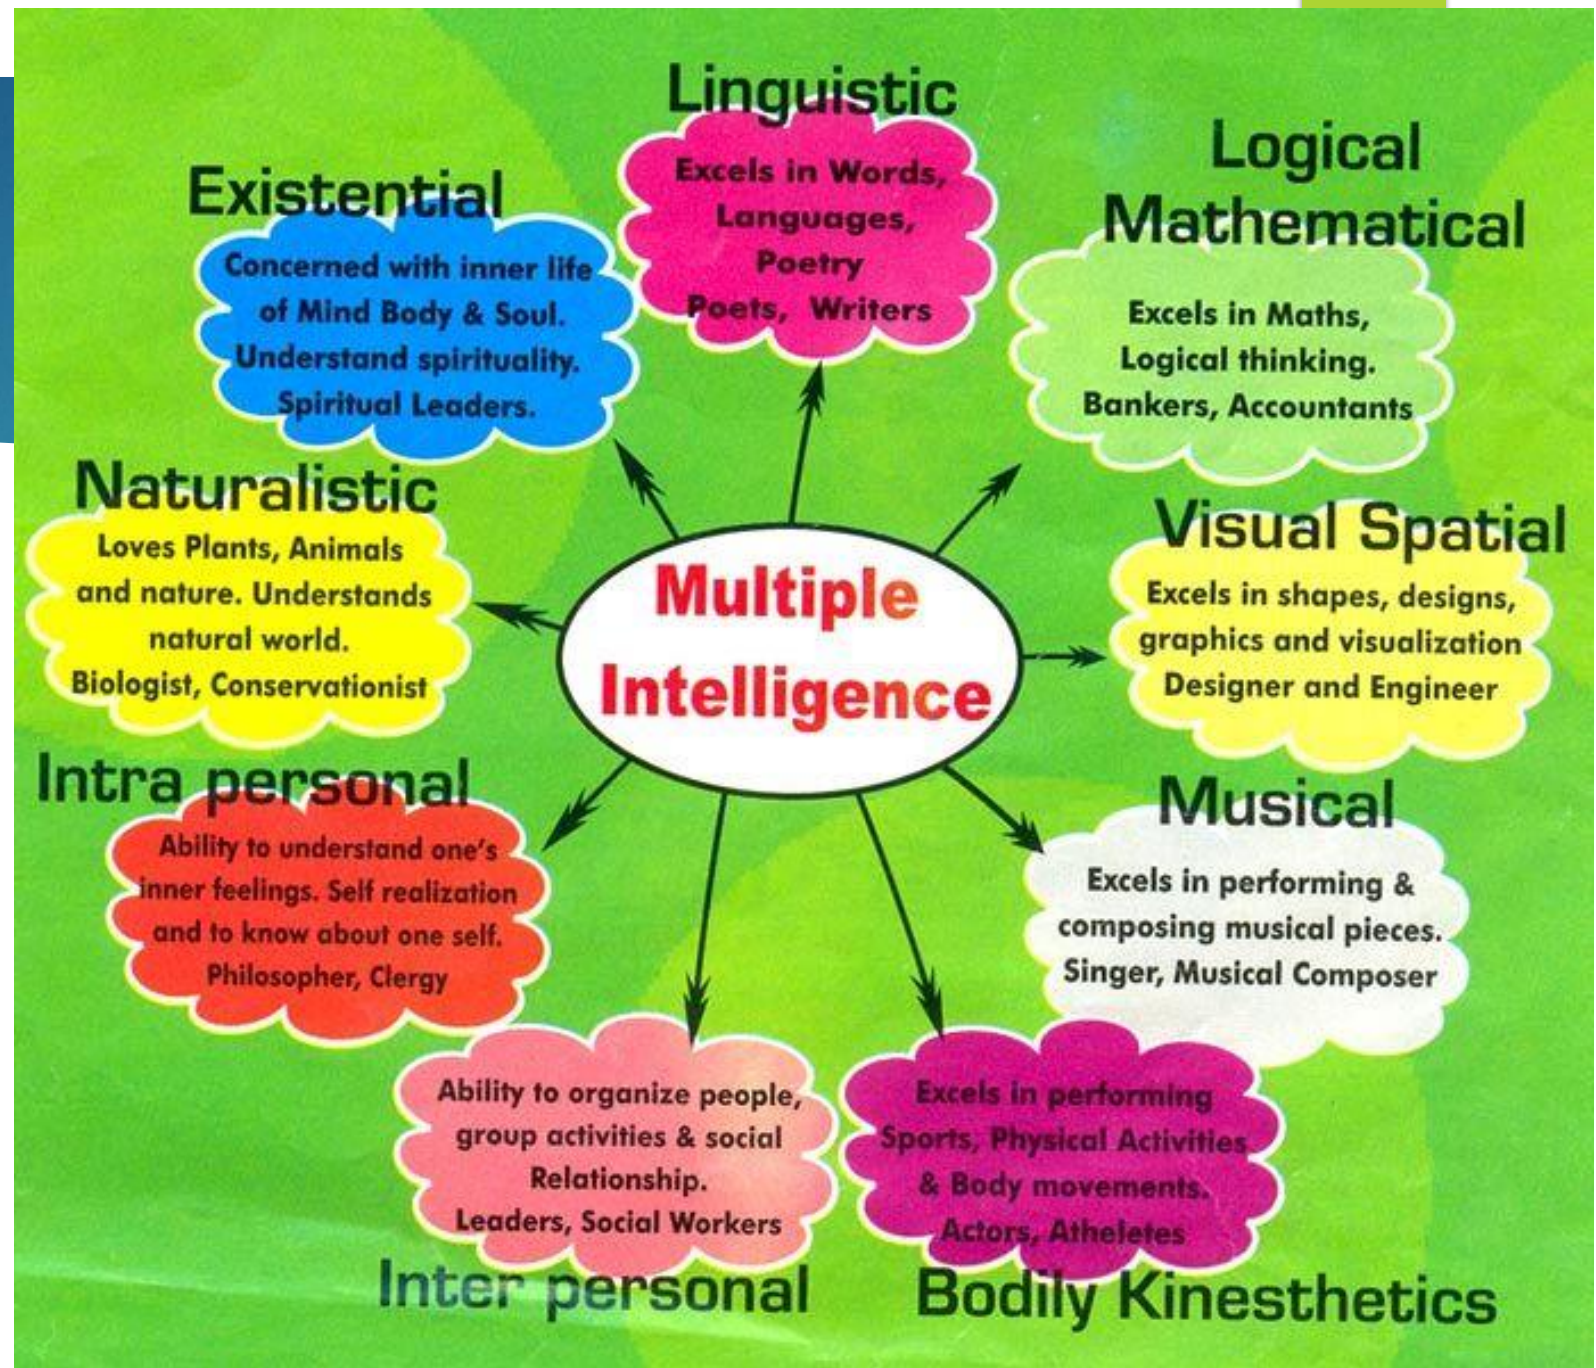

Differentiation is utilizing different approaches to what students learn, how they learn it, and how they demonstrate what they have learned. Approaches are built into the lessons giving students voice and choice in their learning

But Why?

Note Down Howard Gardner's Multiple Intelligence

spatial
visualizing
the world

what you feel,
and what
you want

Activity 3
Can you think of
your students and
can you try to
categorise them
in multiple ways?

Teachers can differentiate

According to

Student characteristics

Content

Examples of differentiating content:

1. Using reading materials at varying readability levels;
2. Putting text materials on tape; Audi books, PPTs
3. Using spelling or vocabulary lists at readiness levels of students;
4. Presenting ideas through both auditory and visual means;
5. Using reading buddies; and
6. Meeting with small groups to re-teach an idea or skill for struggling learners, or to extend the thinking or skills of advanced learners.

- **Helping the students to assess their own level – New gen teachers**
- **Peer reviews help**
 - **Teach Introspection where they need to go back- class 8, 9,10 is OK, I Repeat this always, even as teachers**

Most of us already do –
different textbooks, notes at
different levels

videos, Animations, gifs- STEM
films biopics

Process

Examples of differentiating process:

1. Using tiered activities; **CIA/FA don't help, instead go for Microsoft courses, TRY LEARN – Tier is a lot of work for us, but, GREAT**
2. Providing interest centers;
3. Developing personal agendas (task lists written by the teacher and containing both in-common work for the whole class and work that addresses individual needs of learners); **NAAC- Learner Centric- Needs TRUST- takes time- Mentoring helps -**
4. Offering manipulatives or other hands-on supports; and
5. Varying the length of time a student may take to complete a task. **EXAMPLES**
My REQUEST- IT is OK To have our OWN speeds- RESPECT – We need to believe, Practice, and then try- Leave Insecurity- Concessions – Believe – Story of a topper who lost memory!

Product

Examples of differentiating product:

1. Giving students options of how to express required learning;
2. Using rubrics that match and extend students' varied skills levels;
3. Allowing students to work alone or in small groups on their products; and
4. Encouraging students to create their own product assignments as long as the assignments contain required elements.

First Things, First

- It will be overwhelming to create a rubric for every assignment in a class at once, so start by creating one rubric for one assignment. See how it goes and develop more from there!
- Do not reinvent the wheel. Rubric templates and examples exist all over the Internet, or simply ask colleagues if they have developed rubrics for similar assignments.

Fast Facts: Getting Started with Rubrics

Why You Should Consider Rubrics

Rubrics help instructors:

- Provide students with feedback that is clear, directed and focused on ways to improve learning.
- Demystify assignment expectations so students can focus on the work instead of guessing "what the teacher wants."
- Adapt your approach to teaching aspects of a course based on thematic gaps in student learning that are easily identified by reviewing rubrics across a class.
- Develop consistency in how you evaluate student learning across students and throughout a class.
- Reduce time spent on grading; Increase time spent on teaching.

Rubrics help students:

- Focus their efforts on completing assignments in line with clearly set expectations.
- Self and Peer-reflect on their learning, making informed changes to achieve the desired learning level.

Lets go for a trip to Berkeley

<https://teaching.berkeley.edu/resources/improve/evaluate-course-level-learning/rubrics>

<https://teaching.berkeley.edu/news/know-your-teaching-patterns-sometimes-simple-changes-have-biggest-impact>

Learning Environment

Examples of differentiating learning environment:

1. Making sure there are places in the room to work quietly and without distraction, as well as places that invite student collaboration;
2. Providing materials that reflect a variety of cultures and home settings;
3. Setting out clear guidelines for independent work that matches individual needs; *Labs gives us opportunities*
4. Developing routines that allow students to get help when teachers are busy and cannot help them immediately; and
5. Helping students understand that some learners need to move around to learn, while others do better sitting quietly

Curriculum differentiation

The process of modifying or adapting the curriculum according to the different ability levels of the learners in the classroom. It is a strategy that teachers can use with a view to providing meaningful learning experiences for all learners. Differentiation takes account of learner differences and matches curriculum content and teaching and assessment methods to learning styles and learner needs and characteristics. It may focus on input, task, outcome, output, response, resources or support. (Source: UNESCO 2004b).

Book navigation

-  [GEQAF](#)
-  [Glossary of Curriculum Terminology](#)
 - [Introduction](#)
 -  [A](#)
 -  [B](#)

What Differentiation Is

- Student centered
- For all students
- For heterogeneous groups
- A change in philosophy about how learning should take place
- Multiple approaches or options for content, process, and product
- A mix of whole-class, group, and independent learning
- More about quality than quantity

14

What Differentiation Is

- Flexible and varied
- Proactive in the planning stage
- Rooted in assessment
- Based on continual reflection and adjustment to help students learn well
- A belief system that says all learners come to the classroom with potential ready to be accessed

Traditional Classroom vs. Differentiated Classroom

TRADITIONAL

- Differences are acted upon when problematic.
- Assessment is most common at the end of learning to see “who got it”
- A relatively narrow sense of intelligence prevails
- Coverage of curriculum guides drives instruction
- Whole class instruction dominates
- A single text prevails

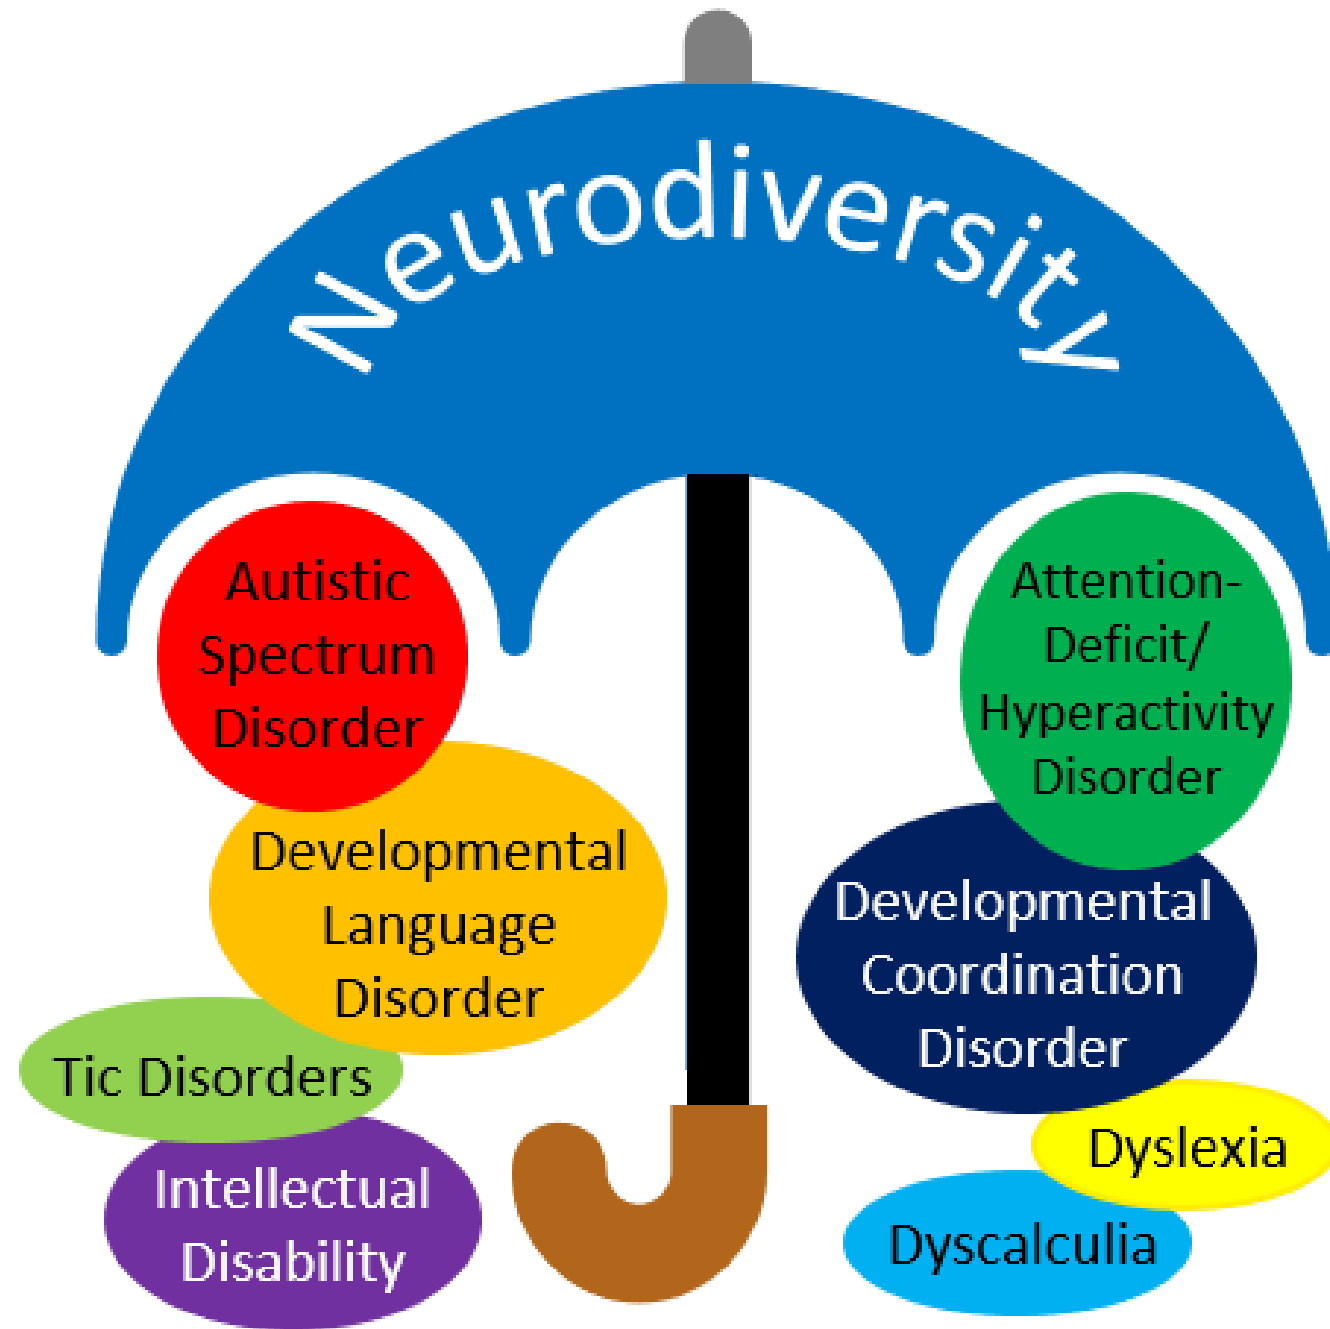

DIFFERENTIATED

- Differences are studied as a basis for planning.
- Assessment is on-going and diagnostic to make instruction more responsive to learner needs
- Focus on multiple forms of intelligences is evident
- Student readiness, interest, and learning profile shape instruction
- Many instructional arrangements are used
- Multiple materials are provided

Adapted from “The Differentiated Classroom: Responding to the Needs of All Learners,” by Carol Ann Tomlinson, 1999, p.16

Assessment – alternate not lower !

- ▶ Always consider alternative forms of assessment where necessary.
- ▶ Standards are not expected to be lowered to accommodate students with a disability but rather are required to give them a **reasonable opportunity** to demonstrate what they have learnt.
- ▶ Once you have a clear picture of how the disability impacts on learning, you can consider alternative assessment strategies.

Who is this child?

- » A child with average or above average intelligence.
- » A child who has the potential but whose academic achievement does not match it.
- » A child who has a gap between oral and written skills.
- » A child who has an erratic performance and "on" days and "off" days.
- » A child who sometimes has more strengths in non- academic areas than the academic areas.

Characteristics of Dyslexia

- » Imperfect Spelling

Success Stories

"Help me! Do something. Help me!" I had told my mom earlier that day.

Namratha

A SECOND CHANCE

"Help me! Do something. Help me!"- I had told my mom earlier that day. I sat there wondering what could possibly be wrong with me. My quarterly results had come and I had successfully managed to fail in all the subjects except English and Sanskrit. In Sanskrit, I had just scraped through. Half yearly and final exams were left and at this rate I was sure I wouldn't be able to pass in those two as well. Impending fear of repeating the 9th grade or being a school dropout (which I thought was more likely) had set in and I was desperately looking out for solutions. No one was able to figure out what was happening. Tuitions after tuitions, sitting and trying hard to study, repeatedly reading the same paragraph again and again, solving the same problem ten times, nothing seemed to work. It didn't make sense. And I didn't know how to make my school teachers or classmates understand what was happening. I was surrounded with all names like "Slow", "Dull" etc. Going to school was

"If Children with dyslexia can't learn the way we teach, then we teach the way they learn"

100

Accommodations

- ▶ Accommodations are changes in the learning environment which provide students access to their learning. These are individual ways content or instructions needs to be presented to a student in order to provide equitable and inclusive access to instruction. The overall goal of accommodations is for every individual to learn to access the content independently. Accommodations may include text to speech technology, such as Immersive Reader; speech to text using Dictation, and access to a screen reader such as Narrator.
- *Immersive Reader and Read Aloud* - check materials such as websites to make sure they are compatible with the Immersive Reader
- *Screen reading software such as Narrator* - check that a screen reader will be able to navigate the content
- *Screen magnification* - understand what students will see and assess that it is useable
- *Speech to text* - practice dictating in the document that will be sent to students

Accommodations – SCERT Teachers

► Reading and Writing

- Immersive Reader
- Dictation
- Office Lens
- Word Prediction
- Translation
- Narrator
- Magnifier

Differential learning resources

- ▶ Can IIT jam books be a resource ? Y
- ▶ Differential class rooms- Vigyan Pratibha examples- sensitive to vocabulary, social strata, place – multilinguistic
- ▶ Examples from UNESCO book
- ▶ Rajendran Tamarapura
- ▶ What did u learn in school today – Kamal mukundComics- energytique-
- ▶ Elephant story
- ▶ Animal story

Lets find out where we can learn ?

ACTIVITY 7

- ▶ Microsoft Innovative Educator Platform
- ▶ Learning Paths
- ▶ Search – based on age, class, subject...higher education, INCLUSIVE, For ALL
- ▶ Come on, Lets Try 😊
- ▶ <https://education.microsoft.com/en-us/resource/1703c312>

CAN Your Instruction be Differentiated?

Take a Moment, Please.... **ACTIVITY 8**

- Do you think you are creative enough to remove possible stumbling blocks in each part of the lesson?
- Do you think you can find out if all students are engaged?
- Can you find if your learning goals intact for each student?
- Are there any barriers to learning for the lowest readers in your class? What about the highest readers? – Do you think YOU CAN Spot
- Can u make your class comfortable for kinesthetic learners?
- Tamil/ Hindi, Telugu... medium learners – is it possible somewhere after five years atleast that you will be able to find tools to help and meet your expectations
- gifted students – will you be able to help them or **help them to seek help**
- Some day, everyday, will every student be able to describe what they have learned **in some way**

17-6-16 Motion

A body is said to be in a state of	rest	when it	changes its position with time
	Motion	does not change	

1) A body is said to be in a state of rest when it does not change its position with time.

2) A body is said to be in a state of Motion when it changes its position with time.

3) Displacement:- The shortest distance or distance travelled along a straight line is called displacement

Velocity

$$\text{Velocity} = \frac{\text{Displacement}}{\text{Time taken}}$$

Unit = m/s

SPEED

$$\text{Acceleration} = \frac{\text{Change of Velocity}}{\text{Time taken}}$$

Unit = m/s^2 or ms^{-2}

Wave Energy

Formation: strong winds blow across the sea and form waves

Principle: Kinetic energy of waves

Procedure: Kinetic energy of waves

Tidal Energy

Formation: Gravitational pull of moon on earth causes to rise and fall (tides)

Principle: Kinetic energy of tides

Procedure: Dams of tides

Ocean Thermal Energy Conversion

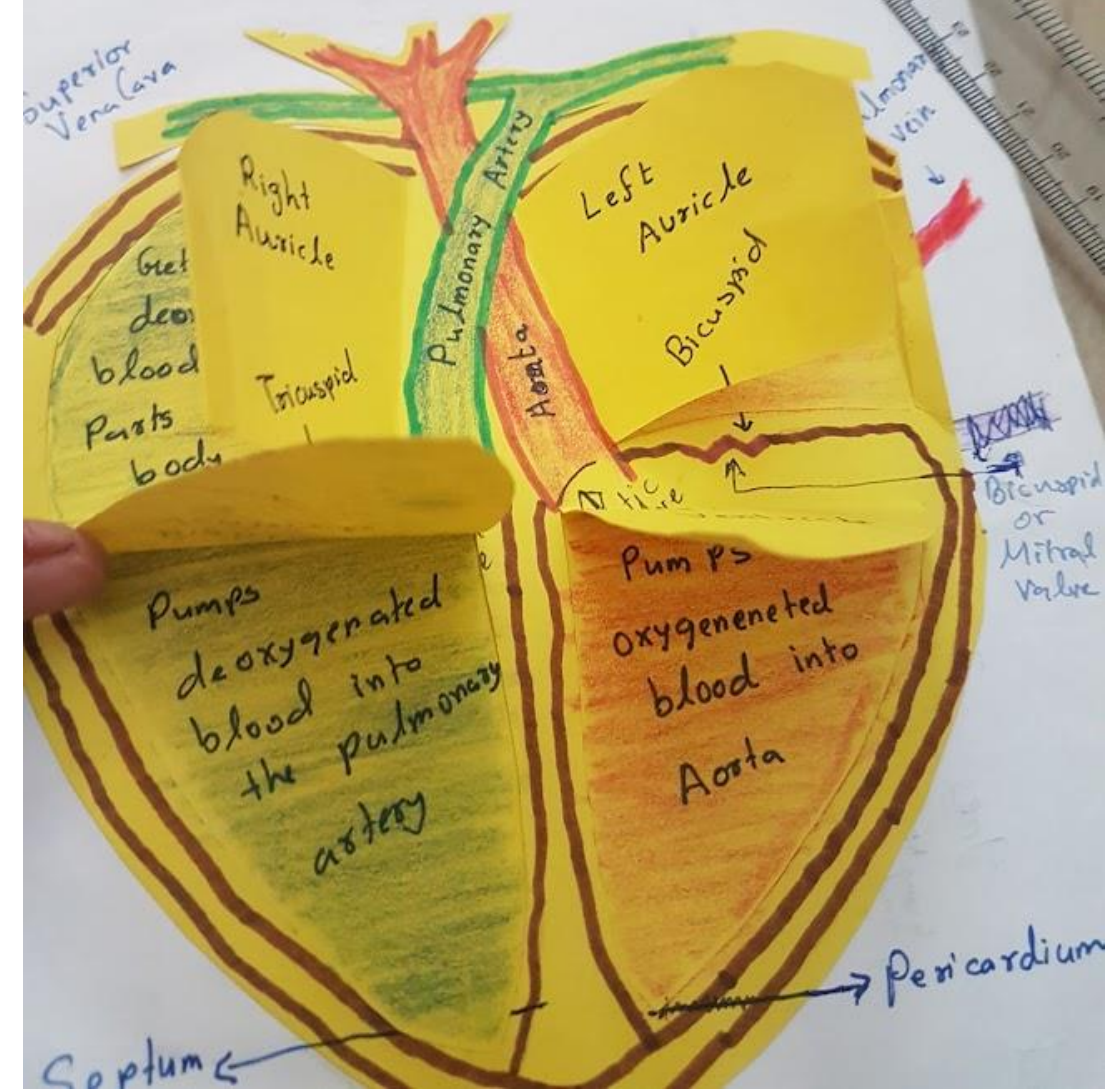

Formation: Heat from the sun warms the surface of the water

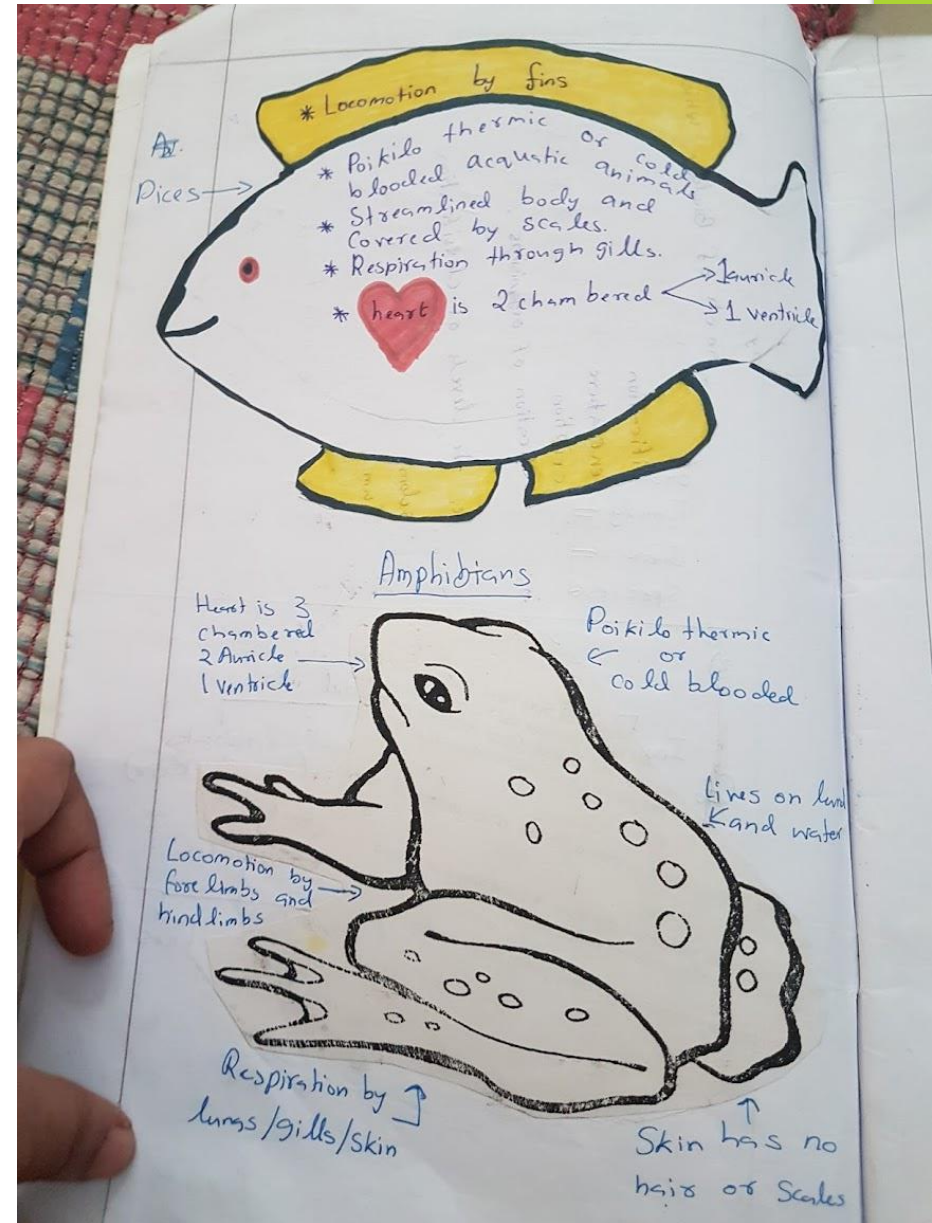

Principle: Heat energy is converted into electrical energy

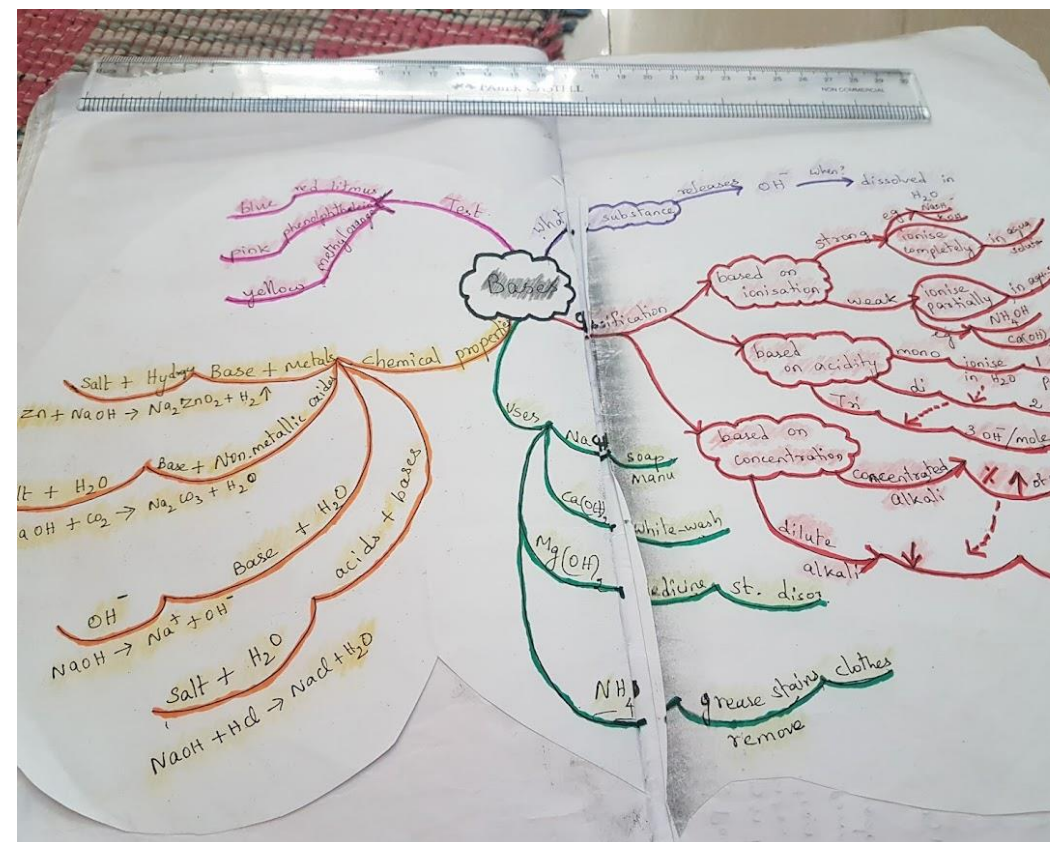

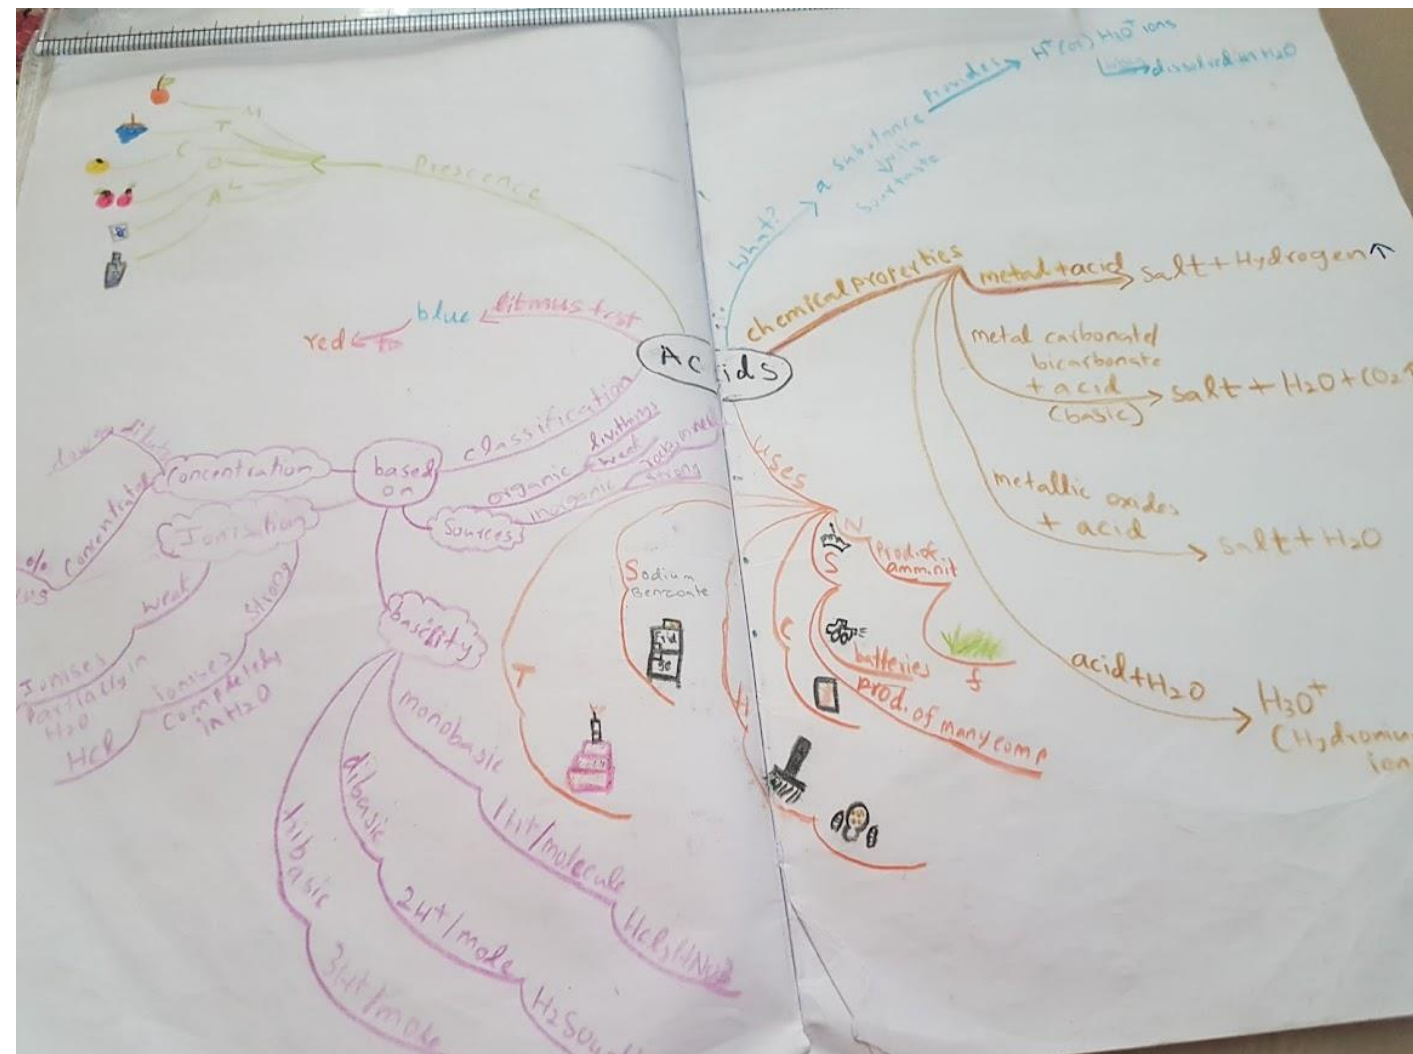

Procedure: Heat exchangers

Heart

Shape: Conical
Location: Between the lungs

11. Suggest a reason for each observation given below.

- In fireworks, powdered magnesium is used rather than magnesium ribbon.
- Zinc and dilute H_2SO_4 react much more quickly when a few drops of copper sulphate solutions are added.
- The reaction between magnesium carbonate and dilute hydrochloric acid speeds up when some concentrated HCl is added.

i) Powdered magnesium

- has a larger surface area.
- reaction is faster

ii) Copper sulphate solution

- acts as a catalyst
- increases the rate of reaction

iii) The rate of reaction increases when the concentration of reactants increases

12. Sodium hydroxide and hydrochloric acid react as shown in this equation.

- Which type of chemical reaction is this?
- The reaction is exothermic. Explain what that means.
- Differentiate exothermic reaction and endothermic reaction.
- What happens to the temperature of the solution as the chemicals react?

13) Neutralisation reaction

14) An exothermic reaction is one in which heat is evolved (given out)

15) Exothermic reaction

- Heat energy liberated during the reaction
- $N_2 + 3H_2 \rightarrow 2NH_3 + \text{Heat}$

Endothermic reaction

- Heat energy absorbed during the reaction
- $2NH_3 + \text{heat} \rightarrow N_2 + 3H_2$

16) Temperature of the solution increases as heat is evolved.

25. What is biomass? What can be done to obtain bioenergy using biomass?

Biomass is biological material.

eg: Cow dung, Vegetable waste and sewage.

Biomass is decomposed in the absence of oxygen and burnt in limited supply of air to give biogas.

26. Which form of energy leads to the least amount of environmental pollution in process of harnessing and utilization? Justify your answer.

Result you will get from a Differential Classroom is evident from

Welcome to HBCSE, TIFR

Homi Bhabha Centre for Science Education (HBCSE) is a National Centre of the [Tata Institute of Fundamental Research \(TIFR\)](#), Mumbai. The broad goals of the Centre are to promote equity and excellence in science and mathematics education from primary school to undergraduate college level and encourage the growth of scientific literacy in the country.

Collaboratively Understanding Biology Education (CUBE)

"Education should not be something we (teachers) do to our students, it should be something we do in collaboration with our Students." Brewer C.A. & Smith D. (2011)

Science as Culture

An alternative paradigm of science education to expand the participatory base of science in the country. CUBE engages students from KG to PG with activities, experiments, field work, meetings, presentations, online discussions etc. to inculcate science as a culture, an ongoing close-to-life practice.

This is an inclusive program open to all irrespective of your background, experience, graduation or grades. It is best captured by one of our slogans: ***"Weak, Meek and Geek all are Welcome!"***.

We believe in Obaid Siddiqi's inspiring thoughts: ***"Sophistication is required in the mind, not in the laboratories"***.

CUBE is an initiative of the [Gnowledge Lab](#) of [HBCSE](#) (Homi Bhabha Centre for Science Education), a national centre of [TIFR \(Tata Institute of Fundamental Research\)](#).
