

Center for Complex Systems & Data Science (CSDS)  
The Institute of Mathematical Sciences  
Chennai

Workshop on  
**Behavior, Evolution,  
Emergence**

**June 8-20, 2026**

The workshop is targeted at young members of the Indian scientific community to introduce them to recent developments in use of quantitative methods for understanding the collective dynamics of biological & social complex systems and their evolution. Apart from progress in understanding the fundamental mechanisms at work in phenomena as diverse as fireflies flashing in unison and behavior of cellular aggregates, these approaches throw new light on how corrective actions can be taken to prevent undesirable collective phenomena such as stampedes in crowds - making them of vital practical importance.

Participants will gain experience from lectures, as well as, through group projects.

### Venue

ECG Sudarshan Hall  
The Institute of Mathematical Sciences  
CIT Campus, Chennai 600113, India

### Participation

Limited seats available. For detail and to apply, please visit workshop webpage at <https://tinyurl.com/y mh8898f>

### Organizers

Shakti N Menon & Sitabhra Sinha
