

1. **Kumar S. Gupta** Noncommutative black-holes and quantum structure of space-time
2. **Brian Dolan** Dimensional reduction, monopoles and dynamical symmetry breaking
3. **T. P. Singh** Noncommutative gravity and the cosmological constant problem
4. **J. Lukierski** Kappa-deformed oscillators: deformed multiplication, deformed flip operators and multiparticle clusters
5. **Sergio Doplicher** Quantum spacetime and noncommutative geometry
6. **Gherardo Piacitelli** Twisted covariance and DFR spacetime quantisation
7. **Adrien Tanasa** Translation-invariant models on the Moyal space
8. **Rabin Banerjee** Gauge symmetries in noncommutative gauge theories
9. **Subir Ghosh** Dirac quantization condition in noncommutative space
10. **Gandalf Lechner**
11. **A. P. Balachandran** Noncommutative space-times and gravity
12. **V. P. Nair** Considerations on noncommutative geometry and gravity
13. **S. G. Rajeev** Geometry of quantum thermodynamics of Van der Waals gases
14. **Sachindeo Vaidya**

15. **Ludwik Dabrowski** Noncommutative instanton bundles and index pairing
16. **Kalyan B. Sinha** Index theorems in quantum mechanics
17. **Biswajit Chakraborty** Entanglement in a noncommutative quantum system
18. **Ranabir Chakrabarti** Universal T matrix for the quantum groups and its applications
19. **Anosh Joseph** Noncommutative phenomenology
